Section 1: Introduction

The *Bank Holding Company Performance Report* (BHCPR) is an analytical tool produced by the Federal Reserve System for supervisory purposes, including on-site examinations and inspections, off-site surveillance and monitoring, and analyses performed in connection with applications filed with the Federal Reserve regarding mergers, acquisitions, and other matters. The BHCPRs are

designed to assist analysts and examiners in determining a bank holding company's financial condition and performance based on financial statements, comparative ratios, trend analyses, and percentile ranks relative to its peers.

It should be noted that no single financial ratio, percentile rank, or trend shown in the BHCPR should

be assumed to be conclusive evidence of a specific firm's financial condition. In appraising a bank holding company's financial condition, an analyst must make a judgment based on an analysis of a variety of factors and interrelationships and on peer group comparisons.

Section 2: Technical Information

Description

The BHCPR is a computer-generated report of current and historical financial information produced quarterly for top-tier bank holding companies with consolidated assets of \$150 million or more. BHCPRs are also produced for top-tier multi-bank holding companies engaged in a nonbank activity involving financial leverage or engaged in credit extending activities; or with outstanding debt to the general public.

Peer group average reports also are available. These reports contain statistics on the average performance of groups of bank holding companies with common characteristics. (See the description of BHCPR peer groups on page 2-2.)

Data Source

The financial data presented in the BHCPR are derived from financial reports which bank holding companies are required to file quarterly with the Federal Reserve System. These financial reports are the *Consolidated Financial Statements for Bank Holding Companies* (FR Y-9C) and the *Parent Company Only Financial Statements for Large Bank Holding Companies* (FR Y-9LP). Detailed descriptions of data elements contained in the FR Y-9C and FR Y-9LP report forms are found in the *Instructions for Preparation of Consolidated Financial Statements for Bank Holding Companies* and the *Instructions for Preparation of Parent Only Financial Statements for Bank Holding Companies*, respectively.

Report Format

An individual BHCPR consists of four sections:

- the *Introductory Page*, which shows

a Table of Contents and indicates the peer group classification and certain characteristics of the bank holding company (BHC);

- the *Summary Ratios* page, which presents selected key financial ratios to measure consolidated earnings and profitability, loan losses, nonaccrual assets and other real estate owned, liquidity, capital, leverage, growth rates, and selected parent company ratios;
- the *Consolidated Information* section, which contains detailed income and expense account items and ratios used to measure the condition of the consolidated BHC and provides balance sheet information on asset and liability composition, including the loan and investment portfolios, liquidity and funding, derivative instruments, allowance for loan and lease losses, charge-offs, past due and nonaccrual assets, capital, Insurance & Broker-Dealer Activities, foreign Activities, Securitization and asset sale Activities, and
- the *Parent Company Information* section provides detailed financial data on the parent company only organization, including measures of profitability, leverage, cash flows, and dependence on subsidiaries.

Each BHCPR displays financial statistics for five time periods. Interim reports (for the March, June, and September reporting periods) provide information for the current quarter, the previous year's comparable quarter, and the last three calendar year-ends. The December year-end BHCPR presents five calendar years of data.

Numerical information displayed in the BHCPR is expressed as:

- a dollar amount in thousands of

dollars (except when otherwise indicated);

- a ratio (expressed as a percentage or a multiple) that relates two or more financial statement items for an individual company;
- an average of account balances or of ratio values for a group of BHCs;
- a percentile rank of an individual BHC's ratio within its peer group;
- a percentage change from the prior year's like quarter or five years earlier; or
- an aggregate sum of an account balance or of the number of BHCs in a peer group.

Dollar values for income and expense items and for changes in equity capital, charge-offs, and recoveries are expressed in the BHCPR as year-to-date amounts. Ratios that involve income and expense items, charge-offs, recoveries, or changes in equity capital are annualized for interim reporting periods. (See the description of annualization on page 2-3.)

Available Reports

Two different types of BHCPRs are available—individual BHC reports and peer group average reports.

Individual BHC Reports

An individual BHC report contains company-specific account balances, financial ratios, and percentile ranks relative to the BHC's peer group. This report also presents peer group ratio averages of the BHC's associated peer group. For sample pages and definitions of the items found in this report, refer to Section 3 of this manual.

Peer Group Average Reports

A peer group average report provides, for a selected peer group, the averages of financial ratios presented in the individual BHCPRs. The report is available for each of the six peer groups of top-tier BHCs described below. The method for calculating peer group ratio averages is described below. Ratio definitions used in calculating peer group averages are identical to those presented in individual BHCPRs and are found in Section 3 of this manual. (See Appendix B for a sample peer group average report.)

Peer Groups

Each U.S. bank holding company with consolidated assets of at least \$150 million, a multi-bank holding company with debt outstanding to the general public, or a multi-bank holding company that is engaged in a nonbank activity (either directly or indirectly) involving financial leverage or engaged in credit extending

activities is classified into one of seven peer groups based on the criteria listed in Table 1.

To show changes in a company's peer group affiliation, the BHCPR identifies the BHC's associated peer group for each reporting period by displaying the two-digit peer number above the "Peer" column of the report page.

Peer Group Ratio Averages

Peer group ratio averages are included in the BHCPR to serve as a frame of reference for evaluating the financial condition and performance of a specific company relative to other firms with similar characteristics. This information serves as a benchmark against which an individual company's balance sheet structure and earnings are evaluated.

A peer group average for a financial ratio is the arithmetic mean of the ratio values calculated for all BHCs in selected peer group subject to

upper and lower limits. That is, to reduce the influence of erroneous or atypical data on peer group ratio averages, values falling above the 95th and below the 5th percentiles for the peer group are excluded from the calculation of the peer group average.

Percentile Rank

The percentile rank is a value that ranges from 0 to 99 and is displayed in a column to the right of the BHC and peer group columns. It reflects the statistical position of a BHC within an array of ratio values for all members of a specified peer group. Moreover, it describes how high or low a BHC's financial ratio is when compared with the ratio values of other BHCs in the peer group. Depending upon the financial ratio analyzed, a high percentile rank may indicate a positive or negative attribute. A high percentile rank for ratios that vary directly with financial soundness (e.g., return on assets or equity capital to total assets) may indicate strength in the particular area measured. Conversely, a high percentile rank for ratios that vary inversely with financial soundness (e.g., net charge-offs to total loans) may indicate a weakness. When using the percentile rank as a means of determining strength or weakness in a financial area, an analyst should use this measure in conjunction with other data such as the appropriateness of the peer group to which the BHC is being compared and related measures of performance.

Table 1. Peer Group Classification

Peer Group Number	Consolidated Asset Size at the End of the Quarter
	Top-tier BHCs excluding atypical BHCs:
01	\$10 billion and over
02	\$3 billion - \$10 billion
03	\$1 billion - \$3 billion
04	\$500 million - \$1 billion
05	\$300 million - \$500 million
06	Less than \$300 million (as of March 2003)
07	Less than \$150 million ¹ (prior to March 2003)
09	Second-tier BHCs and atypical BHCs ²

1. Peer group 7 includes only multi-bank holding companies with debt outstanding to the general public or that are engaged in a nonbank activity (either directly or indirectly) involving financial leverage or engaged in credit extending activities. **Peer group 7 was combined with peer group 6 as of March 2003.**

2. Peer group ratio averages and percentile rank data are omitted from individual BHCPRs generated for lower-tier and atypical BHCs. Second- or lower-tier companies in an organizational structure with consolidated assets of \$1 billion or more are required to file the

FR Y-9C and LP with the Federal Reserve System. A BHC is considered an atypical company if:

- it does not consolidate financial statements for all subsidiaries;
- it has significant non-bank activities;
- its parent company is itself a bank; or
- its operations deviate significantly from other holding companies in the same size category.

Atypical companies are excluded from the calculation of peer group ratio averages to prevent the distortion of comparative financial ratios.

Average Balances

Two methods for calculating average balances of assets and liability accounts are employed in the BHCPR: the four-point and the five-point average balances. The four-point formula applies to quarterly average balances reported by the BHC in Schedule HC-K (Quarterly Averages) of the FR Y-9C report form. This approach involves the calcu-

lation of the arithmetic mean by dividing the cumulative sum of the quarterly average balances to date by the number of quarters that elapsed as of the report date (i.e., one for the March quarter, two for the June quarter, three for the September quarter, or four for the December quarter).

The five-point method is applied to end-of-quarter balances of accounts reported on the balance sheet and accompanying schedules, other than Schedule HC-K. A five-point average is calculated by dividing the cumulative sum of the end-of-quarter balances (beginning with the previous year-end and ending with the most recent quarter) by the number of reporting quarters (i.e., two for the March quarter, three for the June quarter, four for the September quarter, or five for the December quarter).

Annualization

Annualization is the process of converting a ratio to an estimated annual rate by multiplying a ratio generated during the March, June, or September quarters by an annualization factor (4, 2, or 1.33, respectively). A ratio value is annualized when it relates an income account, expense account, or loan loss/recovery item to a balance sheet item. Examples of annualized ratios are the yields on specific assets or cost of

funds. The purpose of annualization is to facilitate trend analysis and to make the comparison of interim-period data consistent with annual data.

Tax Equivalency

The BHCPR adjusts selected income statement items to include the tax benefit associated with income sources that are exempt from state or federal taxes. These adjustments increase the comparability of earnings measures across groups of institutions by translating them into a consistent fully taxable equivalent (FTE) basis. Items related to the tax equivalency adjustments are defined below.

Total tax equivalent adjustment is derived by subtracting pretax income from taxable equivalent pretax income. The amount of "other tax equivalent adjustments" is computed by deducting the tax benefit from tax-exempt income on securities and loans and leases from the total tax equivalent adjustment.

Growth Rates

One-year and five-year percentage changes are provided for certain income statement and balance sheet accounts, while one-quarter and one-year percentage changes are provided for certain securitization

accounts. The BHCPR calculates the one-year percentage change by subtracting the year-ago quarter account balance from the latest quarter's account balance and then dividing the result by the year-ago account balance. Likewise, the five-year percentage change is computed by subtracting the account balance for the corresponding quarter five years earlier from the latest quarter's account balance and then dividing the difference by the latter value. The one-quarter percentage change is computed by subtracting the previous quarter's account balance from the latest quarter's account balance and then dividing the result by the previous quarter's account balance.

Missing Data

In general, dollar amounts and ratio values for FR Y-9C or LP data items that were not collected in the past appear on the BHCPR as "N/A" for periods prior to the initial reporting date. The BHCPR also displays an "N/A" when the divisor of a ratio is equal to zero or in a case where the divisor consists of a negative value for net income or equity capital.

The BHCPR handles extremely large positive or negative values that do not fit within the data columns by replacing the values with "+++++" or "-----," respectively.

Income Statement-Revenues and Expenses

BHCPR page 2 details the major income and expense components of the subject BHC's consolidated income. In addition, an estimate of the tax benefit derived from tax-exempt interest income is allocated between loans and leases and securities. By adding the tax benefit to income, the dollar amounts of income on loans and leases, investment interest income, total interest income, net interest income, adjusted operating income, and pretax net operating income are converted to a fully tax equivalent basis.

The memoranda section presents the components of investment securities income and the portion of income paid as dividends to each type of stockholder. The breakdown of investment income by security type was significantly changed in the March 31, 2001 FR Y-9C. Accordingly, income data is only displayed for investment securities by type beginning in March 2001. The last two columns on the right present one- and five-year growth rates for each income and expense category. (See the description of Growth Rates on page 2-3.)

Relative Income Statement and Margin Analysis

BHCPR page 3 presents the key components of earnings relative to average assets, margin analysis ratios, the yields or returns on specific assets, and the cost of funds. The average balance of each category of investment securities in the Yield or Cost section is based on amortized cost, rather than fair value. For a description of the methods for calculating average balances, see page 2-2.

Definitions of specific average balances used in calculating ratios on this report page are given below.

Definitions of Average Balances

Average Assets

The cumulative sum of the quarterly average consolidated assets year-to-date divided by the number of calendar quarters to date (four-point average).

Average Earning Assets

The cumulative sum of the quarterly average earning assets year-to-date divided by the number of calendar quarters to date (four-point average). Earning assets include investment securities, federal funds sold and securities purchased under agreements to resell, loans and leases (net of unearned income), trading assets, and other earning assets as reported on schedule HC-K of the FR Y-9C.

Average Interest-Bearing Funds

The cumulative sum of the end-of-quarter balances (from the previous year-end to the latest quarter) of interest-bearing deposits, federal funds purchased and securities sold under agreements to repurchase, commercial paper, other borrowed money, subordinated notes and debentures (including equity contract and equity commitment notes) and cumulative preferred stock included

in minority interest divided by the number of reporting quarters (five-point average).

Average Loans and Leases

The cumulative sum of the quarterly average loans and leases (net of unearned income) for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Investment Securities

The cumulative sum of the quarterly average consolidated investment securities for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Interest-Bearing Deposits

The cumulative sum of the quarterly averages for domestic and foreign interest-bearing deposits for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Other Borrowed Funds

The cumulative sum of the quarterly averages of all other borrowed funds for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Other Average Balances

Other average balances, which are not defined above, are calculated based on the five-point average method. This approach consists of dividing the cumulative sum of end-of-quarter balances (of the balance sheet item) from the previous year-end to the latest quarter by the number of reporting quarters.

Derivative Instruments

BHCPR page 10 provides the dollar amounts of derivative contracts, which are grouped according to underlying risk exposure (interest rate contracts, foreign exchange contracts, equity derivative contracts, and commodity and other derivative contracts), financial technique used (futures, options, or swaps), and purpose (trading or hedging). Additional derivatives information includes the gross positive or negative fair values, current credit exposure of derivatives covered under the risk-based capital standards, maturity distribution, replacement costs of past due derivative instruments, and impact of non-traded derivative contracts on net income.

Trading revenues generated from the four types of derivative instruments are provided on BHCPR page 4 (Non-interest Income and Expenses).

Derivative Contracts

The gross notional amount or par value of derivative contracts, which include interest rate contracts, foreign exchange contracts, equity derivative contracts, and commodity and other contracts.

Interest Rate Contracts

The gross notional amount or par value of contracts related to interest-bearing financial instruments or whose cash flows are determined by reference interest rates or other interest rate contracts. This line item includes single currency interest rate swaps, basis swaps, forward rate agreements, and interest rate options, including caps, floors, collars, and corridors.

Foreign Exchange Contracts

The gross notional amount or par value of contracts for the purchase of foreign-denominated currencies and U.S. dollar exchange in the forward market. This line item includes cross-currency interest rate swaps in which there is an exchange of principal,

forward foreign exchange contracts, currency futures, and currency options.

Equity, Commodity, and Other Derivative Contracts

The gross notional amount or par value of contracts in which the return or a portion of the return is linked to the price of a specific equity or commodity or an index of prices of equity, precious metals, petroleum, lumber, or other products.

Derivatives Position

Futures and Forwards

The aggregate par value of contracts that represent agreements in which the buyer agrees to purchase and the seller agrees to deliver, at a specified future date, a specified instrument or commodity at a specified price or yield. While futures contracts are standardized and are traded on organized exchanges that act as the counterparty to each contract, forward contracts are not traded on organized exchanges and their contractual terms are not standardized.

Written Options

The aggregate par value of financial instruments or commodities that the BHC has obligated itself to either purchase or sell under exchange-traded option contracts, for compensation (such as a fee or premium). This line item includes the aggregate notional amount of written caps, floors, and swaptions as well as the written portion of collars and corridors.

Exchange-Traded

The aggregate par value of written options that are traded on organized exchanges.

Over-the-Counter

The aggregate par value of written options that are customized to meet

the specific needs of counterparties to the transaction.

Purchased Options

The aggregate par value of financial instruments or commodities in which the BHC has purchased, for a fee or premium, the right to either purchase or sell under an option contract. This line item includes the aggregate notional amount of purchased caps, floors, and swaptions as well as the purchased portion of collars and corridors.

Exchange-Traded

The aggregate par value of purchased options that are traded on organized exchanges.

Over-the-Counter

The aggregate par value of purchased options that are customized to meet the specific needs of counterparties to the transaction.

Swaps

The notional amount of the underlying principal (interest, foreign exchange or other income or expense) which forms the basis for transactions in which two parties agree to exchange payment streams for a specified period. This line item includes the notional amount of all outstanding interest rate and basis swaps, cross-currency interest rate swaps, equity or equity index swaps, and other swap agreements that are not reportable as either interest rate, foreign exchange, or equity derivative contracts. In cases where the BHC acts as an intermediary, this line item reflects both sides of the transaction.

Held for Trading

The gross notional amount or par value of derivative contracts (interest rate contracts, foreign exchange contracts, equity derivative contracts, and commodity and other contracts) that are held for trading purposes.

Besides derivative instruments used in dealing and other trading activities, this line item covers activities in which the BHC acquires or takes derivatives positions for sale in the near term or with the intent to resell (or repurchase) in order to profit from short-term price movements, accommodate customers' needs, or hedge trading activities.

The notional principal amounts of derivative contracts subject to risk-based capital requirements, excluding foreign exchange contracts with an original maturity of 14 days or less and futures contracts. Also excluded are single currency interest rate swaps in which payments are made based upon two floating rate indices (so-called floating/floating or basis swaps).

*Current Credit Exposure on Risk-Based
Capital Derivative Contracts*

The current credit exposure (or the sum of positive fair values) of derivative contracts that are covered by the risk-based capital standards after considering any legally enforceable bilateral netting agreements. Also called the replacement cost, the current credit exposure equals zero when the market value of a derivative contract is negative or zero. For contracts subject to legally enforceable bilateral netting arrangements (involving a single counterparty), the Federal Reserve Board's risk-based capital guidelines allow positive mark-to-market values to be offset by negative mark-to-market values, thus resulting in a net current exposure with a minimum value of zero.

*Credit Losses on Off-Balance-Sheet
Derivative Contracts*

The year-to-date credit losses incurred on derivative contracts regardless of whether the loss is charged directly to income (e.g., trad-

ing revenue) or the allowance for credit losses on derivatives.

Past Due Derivative Instruments

30–89 Days Past Due

The positive replacement cost (i.e., mark-to-market value) of interest rate, foreign exchange rate, and other equity contracts on which the required payment (by the counterparty of the bank holding company or its consolidated subsidiaries) is due and unpaid for 30–89 days. This item is confidential prior to March 31, 2001.

The positive replacement cost (i.e., mark-to-market value) of interest rate, foreign exchange rate, and other contracts on which the required payment (by the counterparty of the bank hold-

ing company or its consolidated subsidiaries) is due and unpaid for 90 days or more.

Decrease (Increase) in Interest Expense

The decrease (or increase) in interest expense (reported in the Consolidated Income Statement, Schedule HI) resulting from derivative transactions used to hedge or adjust interest expense from liabilities.

The increase (decrease) in net non-interest income (reported in the Consolidated Income Statement, Schedule HI) resulting from derivatives used to hedge or adjust non-interest income from assets or non-interest expense from liabilities.

Increase (Decrease) in Net Income

The sum of the increase (decrease) in interest income, the decrease (increase) in interest expense, and increase (decrease) in non-interest allocations generated from derivatives used to hedge or adjust income from assets or expenses from liabilities. Such amounts may result, for example, from periodic net settlements for swaps or other off-balance-sheet instruments accounted for on the hedge or accrual basis.

Allowance and Net Loan and Lease Losses

BHCPR page 12 provides information on loan and lease losses as well as provisions and the allowance for loan and lease losses. Data on this page are derived primarily from Schedule HI-B of the FR Y-9C.

The first section itemizes the dollar amounts of each source of change in the valuation reserve. The second section presents ratios that relate to the allowance for loan and lease losses, provision for loan and lease losses, charge-offs, write-downs from transfers to loans held for sale, and recoveries. The last section displays net charge-offs (annualized) as a percentage of various loan categories.

Parent Company Analysis-Part I

BHCPR page 22 has six sections that present information on profitability, leverage, cash flow at the parent company level, and nonbank assets of nonbank subsidiaries. The first section provides profitability measures including the return on parent company equity, the return on equity investments by the parent company in bank, nonbank, or bank holding company subsidiaries, and the proportion of bank, nonbank, or bank holding company subsidiary income relative to parent net income. The second section presents leverage ratios indicating the degree of financial leverage in the capital structure, the reliance on long-term versus short-term debt, the degree of protection of creditors, and the extent to which a parent company acts as a financing vehicle for its subsidiaries. The third section presents four double leverage ratios that measure the extent to which the parent company uses debt to fund equity capital investments in subsidiaries. The double leverage payback period indicates the number of years required to eliminate the amount of double leverage based upon the current level of net income or retained earnings.

The fourth section contains coverage ratios that measure actual and potential earnings coverage of the parent company's cash requirements such as operating expenses, dividend payments to stockholders, and interest expenses.

The fifth section presents parent company ratios relating to net assets that are repriced within one year, loans and leases that are 90 days or more past due or in nonaccrual status, and the proportion of equity capital within subsidiaries accounted for by loans guaranteed by the parent.

The final section reports, as a percentage of consolidated BHC assets, the volume of nonbank assets of nonbank subsidiaries. Also shown in this section are thrift and foreign nonbank assets, each expressed as a

percentage of consolidated BHC assets.

Parent Company Analysis-Part II

BHCPR page 23 presents parent and subsidiary payout ratios, followed by ratios indicating the dependence of the parent on its bank, nonbank, and bank holding company subsidiaries. This dependence is based on specific payment flows such as dividends, interest, fees or other income, which are reported on the parent company income statement (Schedule PI of the FR Y-9LP). The last two ratios on this report page indicate the amount owed by the parent company to its subsidiaries relative to short-term or total debt.

Appendix A: Summary of Changes to the BHCPR

This appendix describes the significant changes to the *Bank Holding Company Performance Report* since the publication of the previous edition of the manual (dated March 2002).

Summary of Changes to the March 31, 2003 BHCPR

The following ratios and line items were either modified or added to the March 2003 BHCPR, primarily due to new reporting requirements for the March 2003 FR Y-9C reporting form. Questions regarding the BHCPR should be directed to Kevin Bertsch, Manager, Financial Analysis and Surveillance Section, Division of Banking Supervision and Regulation, at 202-452-5265 or Tony McGatlin, Supervisory Financial Analyst, at 202-728-5894.

1. Peer groups 6 and 7 were combined due to the small number of companies currently in peer group
2. Cover page: "Addressee" was changed to "Address" and the title "Chief Executive Officer" was removed.
3. Page 4, Non-interest Income and Expenses: The title "Insurance Commissions & Fees (Incl Prem)" has been changed to "Insurance Activities Revenues" for both the dollar amount and ratio.
4. Page 15, Insurance and Foreign Activities: The title "Total Insurance Revenue" has been changed to "Insurance Activities Revenue" and three new line items have been added: "Ins & Reins Underwriting Inc", "Cash Surrender Value of Life Insurance", and "CSV Life Insurance/Tier 1 Capital + ALLL".
5. Pages 17 and 18, Securitization and Asset Sale Activities—Parts I and II: The calculations for the line items and ratios for "Retained Credit Enhancements" and its components were revised to include the new item titled "Standby Letters of Credit and other Enhancements".
7. Peer group 7 will be maintained for all periods prior to March 31, 2003.

Appendix B: Sample Peer Group Average Report

This appendix presents sample pages of the Peer Group Average Report which is produced for Peer Groups 1 through 6 (refer to page 2-2 for a description of each peer group). Definitions of ratios contained in this report are, for the most part, identical to those that appear in individual BHCPRs and are found in Section 3 of this manual.
